## (54) INFORMATION DISPLAY DEVICE, AND STORAGE MEDIUM RECORDING INFORMATION DISPLAY PROGRAM

## (57)Abstract:

PROBLEM TO BE SOLVED: To improve the glance recognizability and intuitive recognizability in a time base direction on an information display device.

SOLUTION: The information display device is provided with a time sectioning definition part 2 for defining a time sectioning, a data recording part 4 for recording the time attribute of each data and attributes other than the time attribute, an annual ring plotting part 1 for plotting an annual ring-like metaphor based on the defined contents of the definition part 2 and the recording part 4, a display control part 5 for controlling display based on the information of the plotting part 1 and the recording part 4, and a display means 6 for displaying data based on the control of the display control part. Consequently, intuitive recognizability in the time base direction and the whole glance recognizability can be improved.

## LEGAL STATUS

[Date of request for examination] 18.09.1997

[Date of sending the examiner's decision of rejection] 25.07.2000

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3134825

[Date of registration] 01.12.2000

[Number of appeal against examiner's decision of rejection] 2000-13432

[Date of requesting appeal against examiner's decision of rejection] 24.08.2000

[Date of extinction of right]
